

To Whom It May Concern:

It is my pleasure to offer this letter of recommendation for Clearfield Construction, LLC.

Clearfield Construction was contracted by Capital Metro to construct a concrete trail and pedestrian bridge between the Capital Metro Station and the new ACC campus in Leander, Texas. This will be a great amenity to many students, staff and faculty, as they will be able to use this trail when commuting to campus, to get from the Metro Station to ACC. Beautiful lighting was also installed along the trail, by Clearfield Construction, so the trail is well lit at all times.

Clearfield staff and subcontractors were always professional and courteous and easy to work with. If an issue was brought to their attention, they did not hesitate to take care of it, usually on the spot.

I would be more than willing to work with Clearfield Construction in the future and highly recommend their construction services. Should you have any questions, I can be reached at 512.369.6098.
